Limousin cattle have been near and dear to our family for decades and we are excited to be building back our herd and to offer what we think is a pretty special bull. Enno 30H is going to be a calving ease bull without sacrificing that added muscle and look. Whether you are wanting to make Limflex show heifers or production cattle, Enno will get the job done. His father, EF Xcessive Force, is siring numerous champions in the show ring and the Limousin breed is as hot as ever. Get in while you still have the chance!

Honor & Glory is a maternal brother to the top selling bull at the 2019 IA Beef Expo and Supreme Overall Champion at the Black Hills Stock Show who went on to sell for \$12,000. He is full of muscle, extremely deep sided and is sound at the ground with a big foot to get him around. 135H weaned off at 638 pounds and a 205-day weight of 772. With his super soft pastern, extended front end and being in the top 10% for milk EPD, I think 135H will make the modern kind of females that are in demand. If you are looking to sell by the pound or build your female herd, Honor and Glory can get the job done with style and performance!

Here is a calving ease special, weighed 68 lbs at birth on a first calf heifer. My grandpa was a Limousin breeder for over 40 years and he was so proud to buy me the grand dam of this bull at the 2017 Cattlemen's Classic. She went on to a very good show career and then retired into my herd. This bull is double polled and double black and a very calm disposition. He is bred to raise excellent females.

AUTO Harlem is a stout, big footed bull that will add power to your program. He is a grandson of the great MAGS Manuela, one of the great donor cows in the breed. His carcass traits are also in line with what the packers are demanding. This is a unique pedigree you don't want to miss!
