

HEARTLAND LIMOUSIN ASSOCIATION

Serving Nebraska Limousin Seedstock Producers

The Heartland Limousin Association assists the Nebraska Limousin Association in promoting Limousin genetics to commercial producers.

Limousin genetics have proven to be the best cross on British-based cows. Improved muscle, growth and feed efficiency combined with vastly improved docility is increasing bottom line profits for the producers and feeders alike.

Contact us for information on Limousin genetics and a free copy of the Limousin *Heart Beat*, published five times per year.
